www.BankesBoats.com

The next generation of boat blind has arrived. The all New **Bankes 14' Dominator** is here! We started from the ground up to bring you a duck boat for the 21st Century. A boat that reflects the needs and demands of the modern hunter. The hunting pressure on today's birds demand that you go further and get into places others can't. **The Dominator** only draws 4-5 inches of water, so you can get into places you thought were impossible. Its unique *reverse transom* design pushes mud, cattails, ice, etc. away from the boat ensuring you can get out with ease. The hull has been designed with the **Bankes exclusive R.T.C** (reverse tunnel chine) hull design that turns spray down keeping you dry, even in the worst of conditions. It's sharp 'V' bow slices through waves giving you a superior ride as well as parting natural vegetation, making the boat easier to hide and causing less damage to the marsh. The 'V' in the bow turns into a flat bottom, giving excellent shallow water capabilities. The **R.T.C.** Hull design allows us to have a smooth flat bottom, with no strakes or keels, and still maintain the best cornering and handling of any duck boat on the market. This also means that if you get stuck on a mud flat or the tide goes out, there is nothing to dig in, making the boat easier to push. With its 'V' shaped bow, the boat has excellent ice breaking capabilities, and we even reinforced it with **Kevlar®** to make sure it was bullet proof! There's plenty of room inside the boat for 2 people, a dog and all of your gear. A dual shelving system runs down each side of the cockpit, and provides decoy storage on the lower shelf, leaving the top shelf free for your guns, radio, shells, and anything else you may need. Each shelf runs the entire length of the cockpit, almost 9' long, giving you over 35' of shelving in the boat. Decoy curtains between the shelves are a standard feature, ensuring your decoys will stay put! A dry storage area is provided in the bow, for your life jackets, anchors etc. as well as storage room in the rear for two 5 gallon fuel tanks, and a bilge area for the water, which keeps it off the cockpit floor. **The Dominator** has a complete molded interior liner, meaning that the inside

of the boat was made the same way as the outside, and not just slapped together with some plywood, screws and gelcoat. This interior liner has allowed us to manufacture a boat with **no wood** in it to rot or to maintain, as well as giving you a full flat floor with molded in non-skid that won't wear off, so you can be sure you'll have good footing when you stand up to take your shot. We also incorporated a unique rear driving seat that swings into the storage area when not in use, so it's not in your way while hunting. It keeps you in the boat where you belong, not perched on the coaming where one wrong move could send you overboard. This seat unique to *Bankes Boats* is standard equipment because we feel you can't put a price tag on your safety. Other *standard features* include; molded in non-skid on the bow to make boarding easier, a pebble finish on all surfaces to reduce glare, military style camo right in the gelcoat, not painted on afterwards, so it won't scratch or wear off, interior light, two 12 volt receptacles, 500 GPH bilge pump, battery tray, nylon grassing rails, waterproof electrical panel, navigation

lights, as well as a long list of other amenities and features. Optional equipment includes a locking fibreglass hard top cockpit cover and blind package. The blind is made from 1000 Denier rip stop cordura nylon, with 6061 aircraft grade aluminum frames. Designed to be set up quickly and easily. The blind attaches to the perimeter of the boat by sliding into a unique track, eliminating the need for snaps which can come undone and need replacing as the years go by. In addition by attaching all around the boat you don't have to worry about setting something on the deck and having it roll off into the water, it stay's safe and sound right where you left it! The blind can be set up numerous different ways to suit your needs, set up as a Top Shooter you will have all four sides up, and the top open in order to stand up and shoot out of. In nasty weather you can change to the Side Shooter by dropping one side and adding a roof to keep you warm and dry. This also works great for mallard hunting or on those late season birds that just don't want to come into traditional blinds. And in another *Bankes exclusive* you can choose which side you want to shoot from when you set up the roof. With a *Bankes Boat* you get more choices and the Best value. The blind comes with grassing loops sewn in place so you can easily add your own natural vegetation, and is available in Advantage MAX 4 ® or Military Style camo painted to match the boat. With so much versatility and value you owe it to yourself to check out *The Dominator* before you make your next purchase. Give us a call or stop by your nearest dealer and see for yourself what makes this the hottest *New* duck boat of the 21st Century
