Imagine the Freedom . . . The Freedom to go where you want to go, when you need to go. The Freedom to know the boat you are about to go out in has actually been tested by the US Coast Guard, and far exceeds all of their requirements. The Freedom to chase Sea Ducks, or go Layout Hunting one day and than tuck

into the marsh to go after some mallards the next. Thanks to its amazing 5" draft partnered with the Bankes Exclusive RTC hull design you can do all of this safely, comfortably, and remain dry! The Freedom to know the boat you are purchasing has been hand built just for you, right in our own factory by a dedicated team of craftsmen and fellow duck hunters. We know the demands

you place on your boat, that's why we hand lay the entire boat, selecting only the best materials. We take extra precautions such as reinforcing the bow stem with Kevlar for added insurance, eliminating, and building without any wood in the boat, ensuring your investment will be around for your kids to enjoy, molding in the camo gel coat, so it won't

wear off, and building the boat using three piece construction, meaning the entire inside of the boat is a separate molded fiberglass liner, giving you molded in non-skid on the floor that won't wear off, and making the inside of the boat just as maintenance free and durable as the outside.

As a matter of fact we are the only duck boat on the market with a complete molded interior liner

! The Freedom to know that after more than 35 years of building duck boats we did more than just focus on the construction of the boat, we jamb packed it full of useful and innovative features. Features such as; dual shelving running the entire length of both sides of the cockpit, allowing you to easily store four dozen decoys on the lower shelves and still have plenty of room for all your

other gear on the upper shelves, with decoy curtains running in between the two shelves to keep your things where you put them. A unique swing away rear seat that provides you with a comfortable and safe driving position that swings out of your way and into a storage area when it comes time to hunt. Features such as a molded in bilge area, to keep any water that may get in the boat in one place and not running all over the floor. We have also provided you with

lots of room for 2 five-gallon gas tanks, so you can go wherever the ducks take you, and an ample front storage area for everything else. The Freedom to know we designed a blind and had it tailor made just for this boat, ensuring a proper fit. The blind can be set up any number of different ways, and even comes with a rain roof, for those really nasty days. We have constructed the blind entirely of 1000 Denier Cordura Nylon with 6061 Aircraft grade aluminum support bars, and are offering it to you in either Advantage MAX 4, or Military Style camo painted to match your boat. All this and the blind still sets up quickly

and easily. Now stop imagining The Freedom to have all this at a very competitive price and call or stop by your nearest dealer to check out the possibilities for yourself!
