

The 19' Crusader Boat Blind

By Ron Bankes Marine Services Ltd

The new Bankes 19' Crusader is here! This is the perfect boat for anyone that needs to hunt 4 + people, but doesn't need or want a boat as big as our 21' Goliath. If you have been looking for a boat a little bigger than our 17' Freedom, to take you to your more remote hunting spots, away from everyone else, then this boat is for you. At 19'5" long, and with a 7½' beam, not only will the Crusader get you there and back again, but it will keep you dry and safe along the way. It offers plenty of storage space inside the boat, with 2 side decoy storage area's, a shelf above the decoy storage area's for your smaller items, as well as a large front storage area and dry storage inside the steering consol. The 7 ½' beam gives you a very stable and seaworthy boat. The traditional decked over design helps to make the boat easy to hide. Designed and built with our now famous RTC Hull Design, The 19' Crusader is a great performer. A smooth and dry ride can be expected, along with a quick to plane and easy to handle boat. The boats reverse transom allows you to back up at higher speeds, and through waves, to pick up your decoys faster and easier. The flat boarding pads at the rear of the boat make

getting in and out easier for both you and your dog. It also comes standard with our uniquely designed side mounted console, offering you a great driving position that lets you comfortably drive the boat, and has enough room to mount all of your gauges and electronics. The Crusader has a MAX HP rating of

115HP, and performs great with a 90 or 115HP motor. Also standard on the Crusader is a permanently mounted 25 gallon fuel tank, rack and pinion steering system complete with a black powder-coated Stainless Steel steering wheel. The boat comes standard in our 3 color military style camo gelcoat, and has 2-12V receptacles inside it, along with a water resistant breaker equipped switch panel, full navigation lights, interior lights, decoy curtains for the storage areas, full US COAST GUARD tested foam flotation, molded in boarding areas, molded in non-skid on the floor that won't wear off like paint, and a host of other standard features as well.

Each one of our boats can be made as unique as the person it is made for. We want to build your dream duck hunting boat. Every boat we make is built specifically for a individual, and almost never are two boats I make the same. We can customize the boats, and build in the features that you need to make your hunts successful and enjoyable. Please feel free to call us and discuss any needs you may have.

<u>Specifications</u>	<u>Testimonials</u>
Length : 19' 5" Width : 90" Weight : 1350 lbs Draft : 6 - 7 " Maximum HP : 115 HP Cockpit Opening : 129" x 54" Depth Inside Boat : 30" Max. Capacity : 2250 lbs I have beaten your boat to death this year on waves sand bars and docks. This boat is built tough, and I can't believe there is nothing loose on it yet..... the boat runs great. It jumps on plane at about 20 mph and 2000 rpm. At 3500 rpms it cruises at a comfortable 30+ mph. At 5800 rpm I had it up to 46 mph in a 1 foot chop. It was totally dry. What a boat.....
