Bankes Boats is proud to present the all new 25' Titan. We think this is the Ultimate boat to hunt 7 people comfortably and safely. When you have seen all it's features, I am sure you will agree The Titan is the duck boat for you. Designed and built using the Bankes exclusive Reverse Tunnel Chine design, or RTC for short. The RTC design gives you a smoother drier ride as the bow has a sharp V entry to slice through the waves and transitions to a flat running surface with rounded reverse chines. The reverse chines running the full length turn the spray down keeping you dry and warm. Like all Bankes Boats the reverse transom design lets you back up faster to retrieve birds and decoys and is drier than old fashioned flat across transoms. The 25' Titan is Hand Laid Fibreglass built one at a time, in our own shop, with a crew that has over 100 years of combined experience. This ensures the quality and fit and finish of the boats is second to none. The inside of the boat is all molded fibreglass, giving the boat a double hull style of construction. It is completely foam filled in between the two hulls, making the boat un sinkable. The foam also acts as an insulator, to keep the

cold out and the warm in, as well as making it very quite to run. The fibreglass inner hull virtually eliminates any maintenance. You will never need to paint it, and there is nothing to rot out, just hose it out and you are ready to go. The floor has a molded in non skid surface to give you safe footing and grip. There are two sets of decoy shelves running the entire length of the cockpit, giving you plenty of storage room down the sides of the boat. There is also storage under the front deck under the motor well, and inside the consol.

We've even molded in a rear transom door to make getting in and out of the boat much easier. Complete boat motor trailer packages are available along with many other option. We can customise your boat any way you may need, just ask. As you can seen the Bankes 25' Titan has it all, shallow water draft, stability, seaworthiness, lots of storage room and the ability to hide the boat and shoot out of it. Feature for feature, quality, design and safety set the Titan apart from all other boats.

**Specifications**

Length : 25 10"  
 Width : 96"  
 Weight : 2800 lbs  
 Draft : 6" - 8"  
 Maximum HP : 300 HP  
 Cockpit Opening : 204" x 60"
