

The Intruder Sneak Boat

By Ron Bankes Marine Services Ltd

(519) 586-2544

Introducing The Intruder 12' Sneak Boat from Bankes Hunting Boats. Once again we have responded to the needs of today's hunter for a versatile little boat that can be used as a sneak box, motorized lay-out boat or a marsh boat. We have constructed it of 100% hand laid fiberglass, incorporating a molded interior liner, just like our larger boats. This insures that not only are you getting a top quality boat, but you are getting great standard features and unheard of options in a boat of this size.

Standard features such as nylon grassing rails running the full length of the boat, anti-glare finish on all surfaces, molded in motor well, shelf's running the full length of the cockpit, and a transom that not only is designed to take the added weight of a new 4-stroke motor, but contains no wood to rot or maintain. Available features include navigation lights, interior light, 12 volt receptacle, locking hardtop cockpit cover, and blind packages. The Intruder is built on a planning hull design, which in short means it was specifically designed to be run with a motor, because we figured hey, no one sails their duck boat anymore so why would you want a boat based on a sailboat design? We think you'll agree that not only is this the best designed and most versatile small boat on the market today. It's also the best value. Check one out today at a dealer near you and you be the judge!

Price : \$ 3295.00 US Funds

All prices are F.O.B. our factory, Port Rowan, ONT. Canada
